Bird-Strike Analysis Working Group

BIRD STRIKES TO UNITED KINGDOM CIVIL AIRCRAFT 1966-1971

SUMMARY

The strikes, reported on a World-Wide basis by United Kingdom operators, to aircraft of greater than 5700 kg (12 500 lb), during the 6 year period 1966-1971 have been analysed. The results are discussed and the problem areas highlighted.

This document too long to be added in this report is available on request to Mr. J. THORPE - C.A.A.
(see list of participants)

A Technical Note is normally used in the development work on a particular subject, or to make available work of individual staff. For this reason any opinions and conclusions it may contain are not necessarily the final views of the CAA Airworthiness Division.
