Who is APS ?

- Technological company from Danzig, Poland
- Est. 2015
- Manufacturer of 3D radars, C-UAS systems and c2 software
- Vertically integrated company;
- Strong focus on defence and aviation

What do we have as a product ?

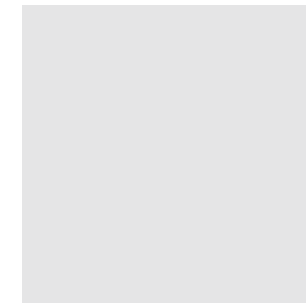

- Modular, panel based 3D avian radar systems
- Flexible and scalable;
- Detection and classification of both drones and birds;
and.....

Affordable !

Why is APS different ?

First of all: we are Solution focussed :

- We go beyond supplying just technology;
- Providing reliable, actionable information which can be applied in a practical way;
- Involve SME's : to convert precious data into meaningful information;
Understanding and assisting how this information can be applied strategically and tactically in the wildlife hazard control process.

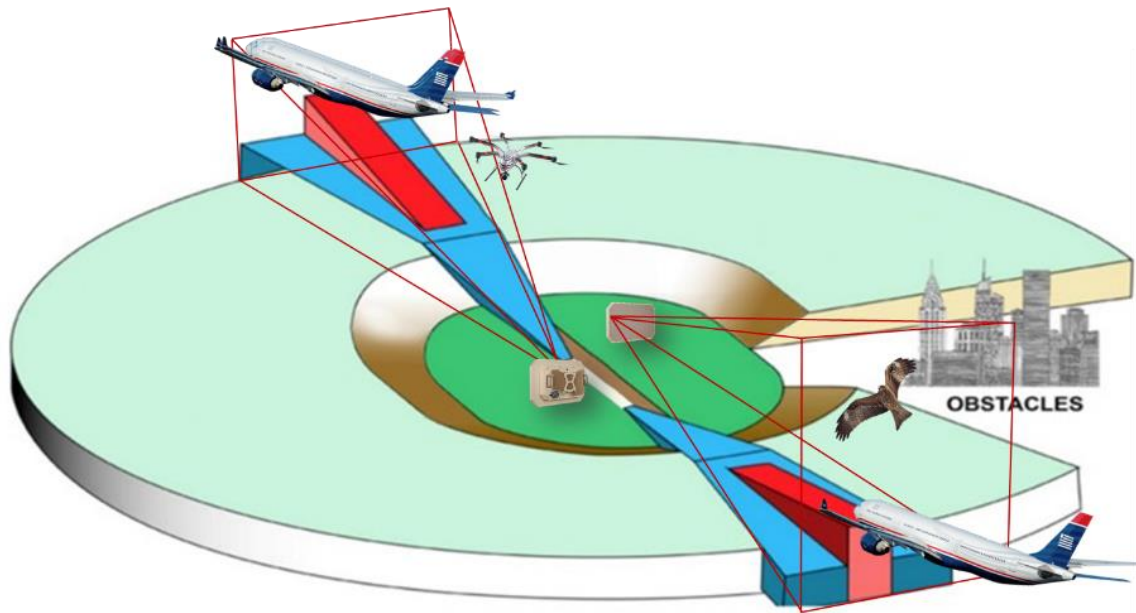

Affordability

An avian radar within everyones budget range;

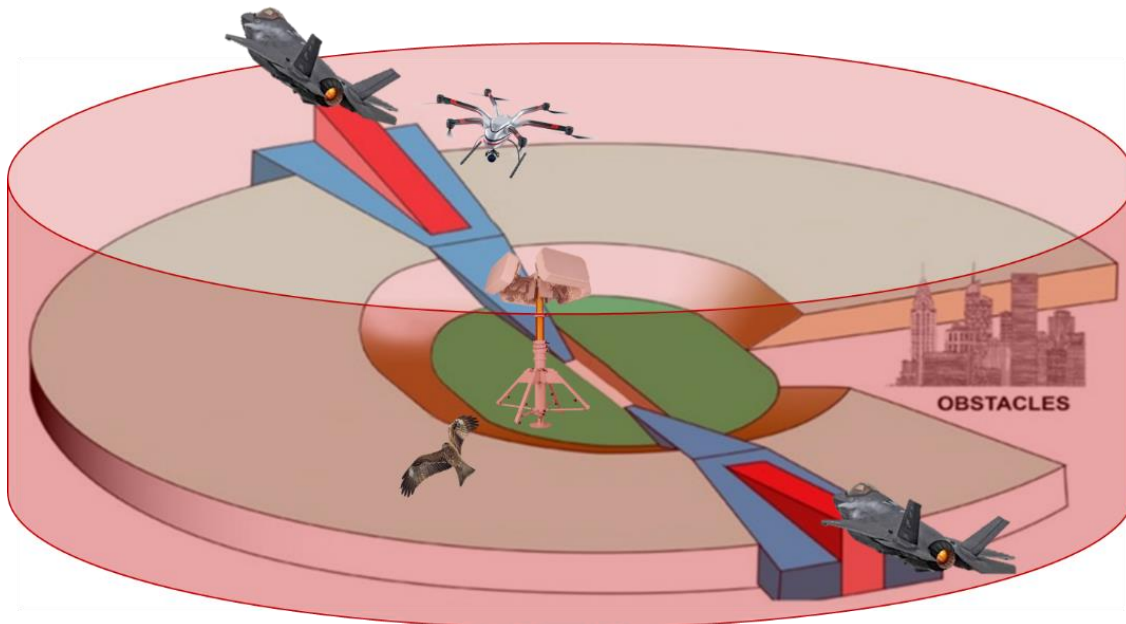

- Cutting out expensive annual service and support fees;
- Offering flexibility in detection capabilities (detection distances and dual bird/drone detection capability);
- Modularity;

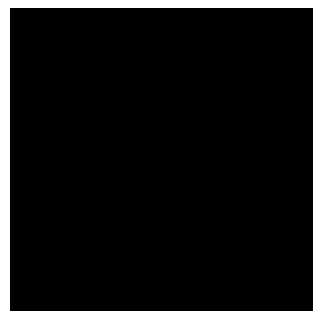

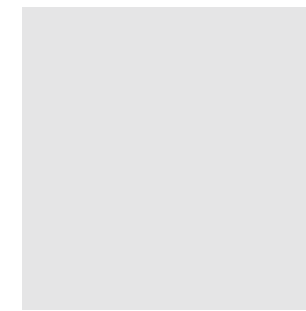

Flexible and modular:
keeping the costs under control

Monitoring only the critical flight zones
(approach and climb out areas)

Providing a 360° view of the aerodrome
