Abstract

The United States Air Force Bird-Aircraft Strike Hazard (BASH) Team has developed a slide-tape presentation demonstrating safe and proper use of airfield bird frightening devices. While written guidance exists on use of these devices, personnel frequently use incorrect frightening techniques. This demonstration will be distributed Air Force-wide for the purpose of standardization and training in proper airfield bird control. The presentation will be available to other agencies through DAVA, Norton AFB, CA 92409.

Slide-tape presentation approximately 25 minutes. No attached paper.
